

Volunteer Opportunity

We are currently in the process of looking to recruit volunteers for the Diabetes in Dalmellington Project. Volunteers are going to play a huge role in this project.

Some of the key duties within this role include;

- Making service users feel welcome on entering the community centre and directing them accordingly.**
- To encourage service users to get involved in conversations and generate ideas about service improvements.**
- To provide a valuable link between the project officer and the community to help feedback ideas which will help to shape the services going forwards.**

If you or anyone you know may be interested and would like to get involved, please email volunteering@aapct.scot.nhs.uk or jonathan.hulme@aapct.scot.nhs.uk
